

Connects on-site technicians using Skype® or Lync® videoconferencing with remote experts

eyebee® Remote Expert

Simple, High Quality Video, Low Cost System to connect field technicians hands-free with remote experts using videoconferencing to solve complex problems quickly and easily for cost savings and higher customer satisfaction.

eyebee® is comprised of a specially-modified Motorola Android smartphone coupled with a small, head-mounted wired USB camera to allow technicians to work hands-free. In addition to Skype, other collaboration tools such as Pointr and XMReality are compatible and provide additional features for remote visual assistance. Please visit our web site for video demos and various use cases.
